PROGRAMMING LANGUAGES AND TECHNOLOGIES

- Ruby on Rails, HTML5, CSS3, Javascript, React, SQL

EDUCATION

DevPoint Labs

Full Stack Ruby on Rails

Salt Lake City, UT

July 2016

University of Utah, David Eccles School of Business

Major: *Information Systems*

Major GPA: 3.2

Salt Lake City, UT

May 2017

TECHNICAL PROJECTS

- *Bucket List* – An app that I have created and styled, where users can create a list of things they would love to do before they kick the bucket. Users are able to see and comment on other people's bucket lists.
Technologies Used: Ruby on Rails, HTML, CSS, Materialize
<https://wu-bucket-list.herokuapp.com/>
- *School Spec* – Used TDD (Test Driven Development) to test and develop the MVC (Model, Views, and Controllers) on Ruby on Rails, with the Rspec gem.
Technologies Used: Ruby on Rails, Rspec gem, Selenium
https://github.com/TaylorWu21/school_rspec
- *Stalk Market* – A web app that my team and I developed for local Utah farmer markets. Vendors from markets can create accounts for their businesses and customers can view their profiles to find out more about the vendors and what markets they are a part of.
Technologies Used: Ruby on Rails, Javascript, React, HTML, CSS, Materialize
