TAYLOR WU

3820 S Congress Drive • Salt Lake City, UT 84123 • (801) 897-8628
TaylorWu21@gmail.com • https://github.com/TaylorWu21

PROGRAMMING LANGUAGES AND TECHNOLOGIES

- RoR, HTML5, CSS3, JavaScript, jQuery, React, Redux, SQL, Java, PHP

EDUCATION

DevPoint Labs   Salt Lake City, UT
Full Stack Ruby on Rails and JS   July 2016

University of Utah, David Eccles School of Business   Salt Lake City, UT
Major: *Information Systems*   May 2017
GPA: 3.4

PROJECTS

- *Personal Blog* – My personal blog that includes projects I have worked on or new technologies I have been learning.
  Website URL: https://taylorwu21.github.io/

- *The Haps* – An app that grabs events from City Weekly API and places them on our custom Google Maps that provides addition information on the app.
  Technologies Used: JavaScript, Express, React, Redux, MongoDB, Materialize
  Website URL: http://www.thehapsmap.com/
  GitHub Repo: https://github.com/spflow/thehaps

- *Stalk Market* – A web app that my team and I developed for local Utah farmer markets. Vendors from markets can create accounts for their businesses and customers can view their profiles to find out more about the vendors and what markets they are a part of.
  Technologies Used: RoR, JavaScript, React, Materialize
  Website URL: https://stalk-market-fowles.herokuapp.com/
  GitHub Repo: https://github.com/jsfowles/wasatch_market

- *Book Keeper* – Website that uses Google Books API to help users create a digital library to keep track of their books. They can also follow other users and add comments.
  Technologies Used: RoR, JavaScript, React, Redux, Materialize
  Website URL: https://book-keeper-wu.herokuapp.com/
  GitHub Repo: https://github.com/TaylorWu21/book_api
